SUMMARY

Software Engineer with 5 years of experience building scalable web and mobile applications using React.js, Next.js, React Native, and TypeScript. Skilled in UI/UX design, accessibility (WCAG 2.1), and modern design systems. Experienced in integrating AI features like Speech Emotion Recognition and image analysis using TensorFlow, Firebase, and OpenAI APIs. Strong collaborator focused on creating responsive, high-performance, and user-centric products.

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, SQL
Frontend Frameworks & Libraries: React.js, Next.js, React Native, Redux, Zustand, React Query, React Hook Form, TailwindCSS, Shadcn/UI, Material UI, Chakra UI, Bootstrap
Backend & Databases: Node.js, Express.js, RESTful APIs, Firebase, Appwrite, MongoDB, Supabase
AI / ML Frameworks: TensorFlow, Keras, Scikit-learn, Speech Emotion Recognition (SER), Audio Feature Extraction, Model Deployment (Firebase ML, TensorFlow Lite)
Accessibility & Design Systems: WCAG 2.1, AXE, Lighthouse, Atomic Design, Design Systems Development
Testing & Quality: Jest, React Testing Library, Cypress, Playwright, ESLint, Prettier, User Acceptance Testing (UAT)
Tools & Platforms: Git, GitHub, VS Code, Android Studio, Vercel, Netlify, Figma, Postman, Vite, Docker, Jira, Agile/Scrum
Other Skills: Responsive Design, Performance Optimization & Profiling, CI/CD Pipelines, Cross-Functional Collaboration, UI/UX Integration

WORK EXPERIENCE

Frontend Developer (07/2025 – Present), UX Designer (01/2025 – 06/2025) | Resilience Inc., USA **01/2025 – Present**

- Building and maintaining critical UI features for a *climate-refugee assistance mobile app*, enabling emergency updates, location-based alerts, and user outreach using React Native, TypeScript, and Material UI, ensuring reliability and responsiveness across devices.
- Designed and tested Figma wireframes, prototypes, and user flows, reducing onboarding drop-off rate by 38% and time-to-completion by 25%, improving early user engagement through iterative usability testing.
- Implemented WCAG 2.1 accessibility standards and validated color contrast and focus states via AXE and Lighthouse audits, ensuring inclusive design for diverse user groups.
- Developed reusable atomic-design-based components integrated into a shared design system, aligning typography, color tokens, and spacing scales, cutting developer handoff time by 50% and minimizing design-related revisions.
- Collaborated in user acceptance testing (UAT) and design reviews with cross-functional teams (project managers, engineers, designers) to ensure technical feasibility, UX consistency, and scalability across app releases.

AI Software Engineer Intern | Resilience Inc., USA **08/2024 – 12/2024**

- Engineered Speech Emotion Recognition (SER) models to detect and analyze user emotions in real time, enabling personalized mental health interventions and improving emotion-classification accuracy by 92%.
- Developed AI-driven data pipelines for audio preprocessing, feature extraction, and model deployment using Python, TensorFlow, and Firebase, ensuring seamless integration within the AIMEE mobile app.
- Collaborated with cross-functional teams to fine-tune emotion detection algorithms, optimize inference latency, and enhance the app's AI responsiveness and user well-being outcomes.

Frontend/Software Developer | COGNIZANT, INDIA **07/2019 – 12/2022**

- Delivered enterprise-level React.js and Redux web applications for Fortune 500 clients in retail and finance sectors.
- Migrated legacy codebases from jQuery to React, improving maintainability and performance.
- Integrated RESTful APIs and implemented client-side caching using React Query, boosting page responsiveness.
- Collaborated with backend teams for seamless API integration and data visualization using Chart.js and D3.js.
- Enhanced accessibility compliance (WCAG 2.1) and cross-browser compatibility for large-scale apps.
- Mentored junior developers on React best practices and Git workflows, improving team productivity by 15%.
- Participated in end-to-end SDLC, including requirement gathering, sprint planning, testing, and deployment.

EDUCATION

Master of Science in Computer Science **Dec 2024**
St. Louis University, MO, USA

PROJECTS

SKINSTRIC AI – Skincare analysis platform (Live Demo | GitHub Repo)
Built a privacy-first skincare platform using Next.js, TypeScript, and Zustand with a multi-step onboarding flow and AI-based image analysis powered by OpenAI Vision API; optimized Next.js Server Components for less than 2 seconds latency and 98% accuracy.

POSTGRAM – Social Media Web App (Live Demo | GitHub Repo)
Developed an Instagram-inspired platform where users create, like, and save posts using React, TypeScript, TailwindCSS, and Appwrite; implemented shadcn/ui components and responsive layouts for seamless multi-device experiences.
